Special Notes:

This product is designed for low wind applications only. It must be retracted when the wind force begins to raise the screen on the cable retentions, otherwise damage could occur.

Fabric seams will always run horizontally. The standard is to place them "AS HIGH AS POSSIBLE" and this will be done unless otherwise specified. The alternative option is to state "AS LOW AS POSSIBLE'. Custom placement of seams is available for a fee, which is listed on the price sheet. Seam placement is from the bottom of the hem bar up to the seam.
